

# Southeast Asia's UCO Price Discovery Centre

## Product Description

The USD Used Cooking Oil FOB Straits (Platts) Futures (FUCO) Contract listed on Bursa Malaysia Derivatives offers a standardised and regulated marketplace for trading Used Cooking Oil (UCO) as a commodity. With the increasing demand for sustainable feedstock in the production of biodiesel and other renewable fuels, FUCO provides market participants with an effective tool for risk management and price discovery in a growing market. The contract is designed to cater to stakeholders across the renewable fuels supply chain.

## Why Trade FUCO?

### Hedge Price Volatility

UCO prices are subject to fluctuations due to changes in supply and demand, policy shifts, and market conditions. Trading FUCO allows market participants to hedge against price volatility, protect profit margins and manage risk exposure effectively.

### Access to a Growing Market

The global market for UCO is expanding, driven by the increased demand for biofuels and renewable energy sources. FUCO provides opportunities to participate in this dynamic and growing market.

### Transparent and Regulated Trading

Trade with confidence in a secure and transparent marketplace regulated by the Securities Commission Malaysia that provides a reliable framework for all trading activities.

### Support Sustainability Goals

UCO is a key feedstock for renewable fuels. By trading FUCO, participants support the circular economy and contribute to global sustainability efforts by promoting the recycling of waste oil.

### Efficient Price Discovery

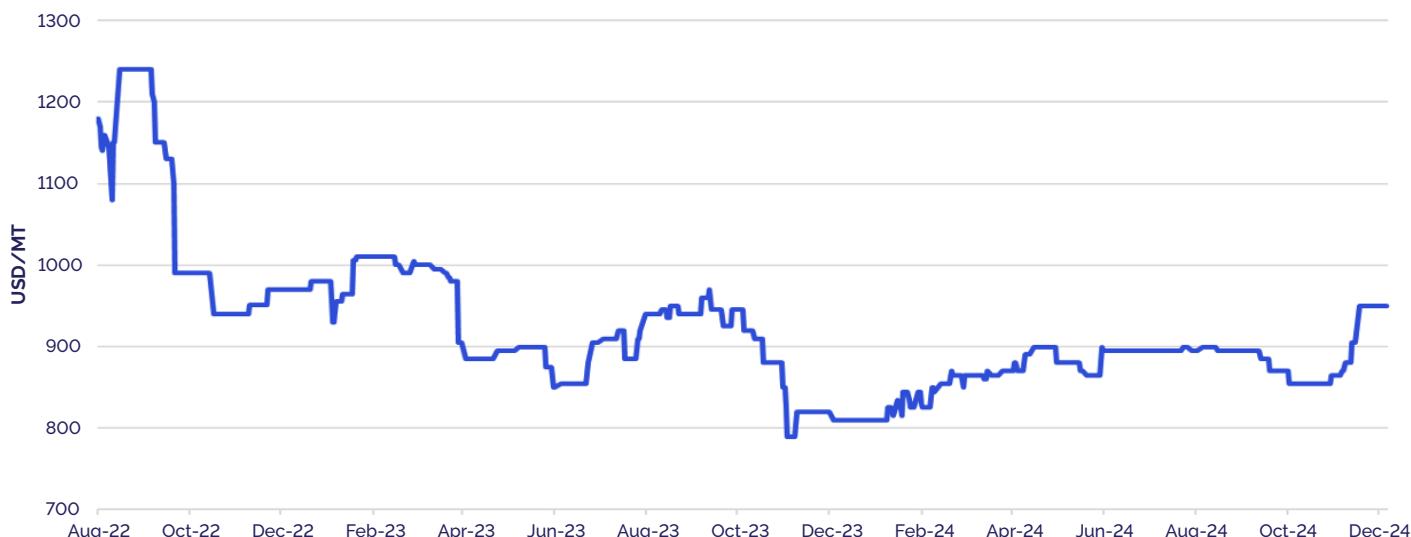

The futures market provides real-time pricing data reflecting global supply and demand, allowing traders and investors to make informed decisions based on current market conditions.

### Portfolio Diversification

FUCO is an alternative asset class for investors and traders, enabling portfolio diversification and exposure to the growing renewable energy sector.
